WORK EXPERIENCE

Senior Software Engineer Koderlabs

08/2020 - Present

Karachi

Achievements/Tasks

- Developed cross-platform mobile apps using React Native, saving time and costs for clients.
- Improved React Native app performance, enhancing user satisfaction and reducing loading times.
- Created responsive web apps with React JS, ensuring excellent user experiences across devices.
- Integrated third-party APIs into apps, adding valuable functionalities for users.
- Implemented pixel-perfect UI/UX designs for React Native and React JS applications.
- Mentored junior developers, fostering collaboration and delivering high-quality code.

EDUCATION

Bachelor in Computer Science from PAF KIET
(08/2018 - 01/2022)

Programming Courses

- Programming Fundamental
- Object Oriented Programming
- Data Structure and Algorithms
- Database Management System

SKILLS

React Native

React JS

Javascript

MongoDB

Rest API

Redux

React Query

Familiar with Node.js (Express)

Problem Solving

Zustand

State Management

PROJECTS

Y-Drive (02/2023 - Present)

- This is a comprehensive ride-sharing application, encompassing both driver and customer mobile applications, complemented by a web-based interface. It operates as a direct competitor to Uber within the industry.

5 Spheres of fit (06/2022 - 09/2022)

- The mobile application is developed using React Native, while the web application is built with React.js. For state management, I've implemented Zustand.

Robopac (01/2022 - 06/2022)

- I independently managed both the frontend and backend development for this mobile application. This application is primarily focused on facilitating the collection of survey data, with the added benefit of receiving products in return.

Raps (05/2021 - 03/2022)

- This web application serves as an administrative panel designed for the purpose of conducting audits.

KIM (03/2021 - 10/2021)

- Our project, a doctor consultancy platform, was developed by my team and me. This US-based initiative offers tailored exercise recommendations based on the user's input.

DOT FMC (11/2020 - 02/2021)

- My team and I have collaboratively engineered a mobile application for truck drivers. This application encompasses essential features, including comprehensive reporting capabilities and an integrated WebView functionality.
